SHEN IP67 Compact Circuit-Breaker Enclosure

Technical reference · SNTELEC · 04 November 2026

SHEN IP67 Compact Circuit-Breaker Enclosure for protecting and organizing electrical components in wall-mounted assemblies. Match the listed enclosure dimensions, cable entries and installation conditions.

Parameter	Specification
Series / reference	SHEN
Protection	IP67; IK09 as specified
Material	ABS shell / PC cover
Outline dimensions	141.3 × 56 × 91.3 mm, per the series drawing
Application	Compact enclosure for DIN-rail circuit-breaker / street-light control assemblies.
Supply scope	Enclosure housing; installed breakers, terminals, glands and other accessories must be specified separately.
Installation	Indoor/outdoor wall mounting; cable entries and cover seals must be correctly assembled.

The enclosure does not itself provide overload or short-circuit protection. Specify the internal devices and verify the completed assembly.

Compiled technical reference. Installation and supply scope must be confirmed for the selected original model. Enclosure ratings do not establish the rating or certification of a complete electrical assembly.
