UKF4 Mini Weatherproof Isolating Switch, 250V

Technical reference · SNTELEC · Revision 2 · 04 November 2026

UKF4 enclosed isolating switch for local disconnection of an electrical circuit during maintenance. Match the selected pole count, rated current, system voltage and installation requirements. It does not provide overload or short-circuit protection.

Parameter	Specification
Series / reference	UKF4
Protection	IP66
Rated voltage	250Vac
Published range	1P/2P; 16A, 20A, 25A or 32A according to the chosen version
Photo example	UKF4-216, 2P, 16A, 250V, 50Hz
Outline reference	Web specification: 86 × 86 × 86 mm nominal. The drawing shows 86.3 mm face dimensions and a separate 83.9 mm reference; confirm the approved mounting drawing.
Housing	UV-resistant PC

The photograph shows the UKF4-216 version. Other current/pole versions require confirmation of the full ordering code. No overcurrent protection is implied.

Installation and supply scope must be confirmed for the exact original model. Enclosure ratings do not establish the rating or certification of a complete electrical assembly.
